

Brainstorming & Idea Prioritization

Date	04 October 2026
Team ID	POCKETSMART-TEAM
Project Name	PocketSmart AI – Smart Budget & Recommendation Assistant using Gemini Models
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Madhumitha S	Build a FastAPI service with registration, login, JWT sessions and one endpoint per budget planner.	Backend / Architecture	1
2	Chitabatini Tanushree	Create a clean landing page, sign-in/registration pages, a dashboard and one form per planner with a readable results view.	UI / UX	2
3	Srija Venkataraman	Use Gemini to split a budget into line items for a home, a party or a jewelry purchase, in INR, with shopping search links for Indian platforms.	Generative AI	3
4	Praveenkanth M	Validate every input, fall back to a rule-based estimate when Gemini is unavailable, keep a per-user recommendation history and write automated tests.	Reliability / Quality	4
5	Karthikha PR	Prepare the project documents, screenshots, run instructions and the demonstration flow.	Documentation / Demo	5

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	FastAPI backend with JWT authentication and planner endpoints	High	High	1	Yes
2	Account pages, dashboard and planner forms	High	High	2	Yes
3	Gemini-based budget breakdown with shopping links	High	High	3	Yes
4	Validation, static fallback, history and tests	High	High	4	Yes
5	Project documents, screenshots and demo preparation	High	Medium	5	Yes

Team Ownership

- Madhumitha S: architecture, routes, authentication and session handling.
- Chitabatini Tanushree: Jinja2 templates, CSS, planner forms and results display.
- Srija Venkataraman: Gemini prompts, model selection with retry, JSON parsing and shopping links.
- Praveenkanth M: input validation, fallback behaviour and automated tests.
- Karthikha PR: project documents, screenshots, run instructions and demo preparation.
