

Data Flow Diagram

Date	04 October 2026
Team ID	POCKETSMART-TEAM
Project Name	PocketSmart AI – Smart Budget & Recommendation Assistant using Gemini Models
Maximum Marks	2 Marks

Level 0 and Level 1 Diagrams

Level 0 – Context Diagram

Level 1 – Main Processes

Symbol	Name	Meaning in this project
External entity	User / Google Gemini API	The user supplies credentials, budgets and requirements; Gemini returns generated JSON.

Process	Authenticate / Validate / Generate / Save & Show	Application logic handled by FastAPI (main.py, auth.py, gemini_utils.py).
Data store	D1, D2 (in-memory), D3 (uploads folder)	Users and sessions, recommendation history, and uploaded outfit images.
Arrow	Data flow	Credentials, token, planner input, prompt, AI response, plan and history data.

Note: D1 and D2 are Python dictionaries held in application memory, so they are cleared when the server restarts.
