

Project Executable Files

Date	04 October 2026
Team ID	POCKETSMART-TEAM
Project Name	PocketSmart AI – Smart Budget & Recommendation Assistant using Gemini Models
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Status
1	Complete source code	Yes
2	README / setup guide	Yes (README.md; run steps are also listed below)
3	requirements.txt	Yes
4	Database module / schema	NA – data is held in memory; schemas are in models.py
5	Environment configuration	Yes (.env.example)
6	Deployed application URL	NA – local execution
7	Mobile/Desktop executable	NA – web application
8	Test evidence	Yes (tests/test_app.py – 11 passing tests)
9	Demo video	To be added by the team
10	Github link	Madhu13112006/pocketsmart-ai

Step 2: File / Folder Structure

```
pocketsmart-ai/  
|-- main.py           FastAPI application and routes  
|-- auth.py           Authentication and sessions  
|-- gemini_utils.py   Gemini integration and fallbacks  
|-- models.py         Pydantic schemas  
|-- templates/        Jinja2 HTML pages  
|-- static/           CSS, JavaScript, uploads  
|-- tests/            pytest tests  
|-- requirements.txt   Python dependencies  
|-- .env.example       Environment variable template  
`-- README.md         Project information
```

Step 3: Run Instructions

1. Install Python 3.10 or later and create a virtual environment (python -m venv venv, then activate it).
2. Install dependencies: pip install -r requirements.txt
3. Copy .env.example to .env and set GOOGLE_API_KEY (from Google AI Studio) and a random SECRET_KEY.

4. Start the server: `python main.py` (or `uvicorn main:app --reload`).
5. Open `http://127.0.0.1:8000` in a browser (interactive API docs at `/docs`).
6. Register, sign in, choose a planner, enter a budget and generate a plan.
7. Run the tests with: `pytest tests`

If `GOOGLE_API_KEY` is missing, the application still runs and every planner returns the labelled fallback estimate.

Team Ownership

Backend Lead – application execution and integration; Frontend Lead – UI demonstration; AI Integration Lead – AI configuration; Testing & Documentation Lead – documentation and test evidence.
